

Inclusive Data Charter monitoring form - guidance

Please note the following:

- This is a voluntary exercise but it would be great if **every** IDC Champion could complete the form in as much detail as you can. Some IDC Champions have only recently launched their action plan/or are in the process of finalising/revising theirs but it is important and useful if we have baseline data on all Champions (even if this might be brief). This will enable us to really track progress year on year.
- You do not need to report against every Principle (if there are some) that do not link to actions in your action plan. In this case, please just put N/A in the free text box next to the Principle.
- To mark the 1 year anniversary of the launch of the IDC, we hope to develop a range of materials (including some case studies; a summary of actions; and social media activity) to showcase the progress that has been made by Champions and the impact of the IDC. This will be put together using the information you include on the form. The more detail you are able to include the better. Please write the content as clearly as possible and ensure you explain any acronyms or organisation/country/sector specific terms.
- Please attach any supplementary documents (articles/reports/guidance/training material/social media coverage) or links you have that support the content of the form.
- If you have progress to share around actions (not in your IDC action plan but contributing to strengthening data disaggregation as we work towards the SDGs), please detail this in **Section 4 – Additional comments about progress**.

INCLUSIVE DATA CHARTER INITIATIVE (ANNUAL MONITORING) 2019

Name of IDC Champion:	UNICEF
Date that your IDC action plan was published:	10 July 2018
Date of submission of this monitoring form:	14 June 2019
Name of person responsible for completing your IDC monitoring form:	Toby Wicks and Mark Hereward

Before you complete this form, please refer to the guidance above. Please return the form to Linsey (lwinter@sightsavers.org) by Friday 14 June.

1. PROGRESS - THE FIVE IDC PRINCIPLES

SCORE 1. No Progress; 2. Some Progress; 3. On Track to Deliver; 4. Delivering a little faster than plan; 5. Delivering much faster than plan

		SCORE	ACTION PLAN PROGRESS (NARRATIVE). Please describe key achievements in the past year or since you signed up to the Charter (in relation to each principle) and justify your scoring. This should link to actions in your IDC action plan. Please attach any supporting documents.
1.1	Principle One - All populations must be included in the data.	2.	UNICEF has recently begun mapping data on the situation of children in humanitarian and fragile situations, with the view to defining and mobilizing with humanitarian partners around catalytic initiatives and public data goods that will improve data for humanitarian action for children; this includes a focus on those populations that are hard to reach.
1.2	Principle Two - All data should, wherever possible, be disaggregated in order to accurately describe all populations.	2.	Above mentioned focus on improving data for humanitarian action for children has included a process to identify priority entry points for strengthening data to improve the lens on gender, age and disability differences for humanitarian action for children. This is intended as a process to engage with UNICEF humanitarian partners including reaching out through humanitarian clusters around common data methods, tools and processes. UNICEF also continued to advance work on information management platforms which support stronger RBM, including disaggregation of data in

			partner reporting; the organization piloted platforms for UNICEF implementing partners in three countries in late 2018-early 2019 (Zimbabwe, Rwanda, Sudan) and is ready now to pilot a similar interoperable platform for UNICEF-led humanitarian clusters.
1.3	Principle Three - Data should be drawn from all available sources.	2.	Some good progress on an administrative data maturity model, data quality framework, and
1.4	Principle Four - Those responsible for the collection of data and production of statistics must be accountable.	2.	Good progress on methodological development; country demand for MICS increasing significantly.
1.5	Principle Five - Human and technical capacity to collect, analyze, and use disaggregated data must be improved, including through adequate and sustainable financing.	2.	Good progress on a “data savvy” capacity assessment within UNICEF and development of a repository of existing appropriate resources for staff to build their skills in this area.

2. PROGRESS – OUTCOMES, OUTREACH AND ENGAGEMENT

OUTCOMES, OUTREACH AND ENGAGEMENT PROGRESS (NARRATIVE). Please describe in detail what you have done in relation to each question (over the past year or since you signed up to the IDC). Please attach any supporting documents.

2.1	Has the progress described in your narrative response above (in section 1) brought about any change in policy; programmes; and/or practice? This could be internal or external.	Thanks to the IDC we’ve gained momentum in pushing for related initiatives – e.g. administrative data maturity model, country-level data action plans, catalytic data for children fund.	
2.2	Which of the following has signing up to the Inclusive Data Charter helped strengthen in your organisation in relation to data disaggregation? Select all that apply.	a) Data b) Skills c) Knowledge d) Resources e) Other	a), c), and d)
2.3	Have you collaborated with other IDC Champions in terms of the actions you have outlined above in the past year (in section 1)? If yes, then please name them and describe what you did.	Not yet.	

2.4	Are there specific Champions you would like to collaborate with over the next year; and if yes, what on?	Keen to collaborate on “data savvy / skills” with IDC champions in 2019/20.
2.5	Have you shared practice with other countries/organisations on the actions you outline in Section 1? If so, please name them and what you did.	Shared Data for Children Strategic Framework and Inclusive Data Charter with UNHCR.
2.6	Have you encouraged other countries/organisations to sign up to the Inclusive Data Charter? If yes, which were these?	UNHCR, UNFPA, IOM.

3. CHALLENGES - IMPLEMENTING YOUR ACTION PLAN

3.1	What, if any, have been the challenges with implementing your IDC action plan? How have you overcome these challenges?	Increasing knowledge and understanding across the entire organisation. We’re launching a “data quality framework” to make sure we’re consistent in terms of language and expectations as well as a “data savvy” initiative to make sure we have a critical mass of staff who “know what good (enough) looks like”.
3.2	How can the IDC Secretariat support you over the next year?	Support sharing of approaches and experiences particularly in fragile and humanitarian situations, to contribute to building common understanding of challenges and viable approaches in different contexts.

4. ADDITIONAL COMMENTS ABOUT PROGRESS (NOT COVERED ABOVE) SINCE YOU SIGNED UP TO THE IDC

This section could be used to describe other actions you have completed/are completing since signing up to the Charter (not necessarily outlined in your IDC action plan).
