Offerors are encouraged to read this RFP in its entirety, paying specific attention to the scope of services, instructions, and requirements. Section 1: Background and purpose

Background: United Nations Foundation

The United Nations Foundation links the UN’s work with others around the world, mobilizing the energy and expertise of business and non-governmental organizations to help the UN tackle

issues including climate change, data, global health, peace and security, women's empowerment, poverty eradication, energy access, and U.S.-UN relations. The United Nations Foundation hosts and provides administrative, financial and contractual services for the Global Partnership. For more information, visit www.unfoundation.org.

Background: Global Partnership for Sustainable Development Data

The Global Partnership for Sustainable Development Data is a dynamic global network of governments, UN agencies, private companies and civil society organizations. The Global Partnership convenes, connects and catalyzes action to address the problems of poor data use, access, quality and production, and to work with stakeholders to fully harness the new opportunities of the data revolution in the service of sustainable development. For more information, visit www.data4sdgs.org.

Background: Photography/Videography

The Global Partnership's multimedia work aims to bring a fresh visual approach and engaging style to promote the use of data to monitor and achieve the Sustainable Development Goals. The Global Partnership believes the lack of engaging and understandable visual approaches to data holds back the sector and that explaining, democratizing, diversifying, and promoting the use of data for development can be supported by strong communication outputs. The Global Partnership is keen to work with experts that can help capture our work visually and engage existing and new audiences. The Global Partnership works on various projects and hosts or collaborates on a number of events each year both in the U.S. and internationally and may require photography and videography services to capture these.

Section 2: Scope of services

The Global Partnership is interested in engaging individual consultants and/or video production companies and is also eager to engage consultants in a variety of locations. Because of this, the Global Partnership does not expect all Offerors to have expertise in all aspects of the Scope of Services. In the proposal, the Offeror must clearly lay out what types of work they are able to complete for the Global Partnership. The following are sample activities successful Offerors may be asked to complete, depending on the needs of the Global Partnership:

(If a consulting firm is bidding, the Global Partnership would look for these qualifications from the lead individual and others likely to be significantly engaged in the work.)
