Looking ahead

No	Question	Guidance	Champion response
3.1	What are your priorities for your IDC action plan / inclusive data work in the next 12 months?		Advocating on inclusive data for children in street situations, including through meaningful child participation and data-driven policy formation. Specifically

			<p>this includes asking governments to: Commit to developing and using accurate evidence, based on disaggregated data collected both about children in street situations and in partnership with them, capturing their experiences and needs. This will provide a robust foundation for policies and programmes that are responsive to the realities of street-connected children's lives and the violence they face. This includes integrating data on children in street situations into child-focused urban initiatives, such as the New Urban Agenda.</p>
